

# AXIE NINJA

Gamepaper ver. 1

# INTRODUCTION

*AXIE NINJA is a blockchain-based tournament platform that allows players of all skill levels, as well as developers and organisers, to profit from their efforts. AXIE NINJA is a platform that allows all gamers to profit from their abilities. Our goal is to create a fair and trustworthy "play-to-earn" platform where players may play their favourite games, challenge an opponent (or allow AXIE NINJA locate one for them), and bet on their own triumph.*

*AXIE NINJA is a groundbreaking web-based BSC roleplaying game created by the outstanding Riveted Games team and launched on the Binance Smart Chain. After fighting fees and participating in raids, players are rewarded with SKILL tokens, which are the game's primary mechanics. To boost their overall power, they can hire more characters, make unique weapons, and reforge those weapons. On an open market, players may also exchange their characters and weapons. They can also put their SKILL earnings on the line in exchange for more SKILL.*

# AXN

## VISION

*Our vision is enabling gamers to reclaim control of their digital assets, allowing them to Play to Earn while also increasing the adoption of blockchain technology in their daily life.*

## MISSION

*Our mission is to provide our players with an enjoyable and rewarding experience, to build a healthy and enthusiastic community around blockchain gaming, and to create an ecosystem of Play to Earn systems to fulfil the demands of all gamers across the world.*

## MARKET

*AXIE NINJA is a blockchain game first and foremost, which implies that players own their coined BSCs (characters and weapons). The player owns the entire right to sell and trade. To make this procedure more trustworthy, AXIE NINJA established a market. The player can look up characters and weapons that have been mentioned by other players, as well as create their own. Each transaction is subject to a minor buyer fee.*

# AXN

## TOKEN UTILITY

*Gamers can earn AXIE NINJA and BSCs through playing, improving their ranking, or achieving certain goals. Players can unlock AXIE NINJA and BSCs prizes based on their activity on the platform by staking AXIE NINJA or providing liquidity. AXIE NINJA grants access to Tournaments, Leagues, big stakes, low fees, and DeFi-only chances. AXIE NINJA is used by organisers to build communities and organise tournaments and leagues. The greater the event, the more AXIE NINJA there are. Allow gamers to steer and direct the AXIE NINJA platform's future.*

# AXN

## NFT

*Stake your AXIE NINJA NFT at the game platform. It will generate AXIE NINJA tokens for you every block.*

## AXIE DEFLATION

*A 4% fee will be applied to each Sell transaction. The fee for disbursing interest to participants in this operation would be automatically added to the Locked Staking contract.*

# AXN

## PLAY TO EARN

*Have you ever considered pursuing a career as a professional gamer?*

*You can Now be a Professional Gamer.*

*OXIE NINJA makes it simple to earn money every day. Tournaments, Ranked play, and Quests are all ways for players to earn prizes! There is always a possibility to gain, regardless of your skill level or collection size!*

*You might win a variety of prizes, including collector cards of various Ninja's, Swords & Shields, Card Packs, magic potions, and Dark Energy Crystals (a tradable, digital currency used to buy items in the shop).*

## *CONCLUSION*

*The AXIE NINJA is driven by a broad vision and the belief that the advent of "smart," blockchain-based platforms would offer billions of people unprecedented access to the global economy. These platforms will also result in a substantial change in competencies and financial shocks. Cryptocurrencies and smart contracts will pave the way for a new wave of expertise transfers, putting tremendous pressure on some industries. Furthermore, a decentralised system dilutes influence at the top of the pyramid. Decentralized organisations and permission-less systems are likely to become the norm. Our purpose with this new and multi-faceted configuration is to enable global access to a recognisable and liquid coin that can be used for a variety of purposes and on a variety of smart platforms. A truly global crypto currency that enables the decentralised economy to function.*
